WORKING EXPERIENCE

Zframe Works Engineering SDN BHD (Diploma Internship Nov 2022 - Jan 2023)

My internship company assigned me to work on one of their software products, WESS. I work as a front end developer to design and implement visually appealing user interfaces of web app using **Vue.js** framework.

FusionQB SDN BHD (Degree Internship Feb 2025 - July 2025)

My internship company assigned me to work on few software products including loyalty system, nirvana, and etc. I work as a full-stack developer and using **React.js** as front-end and **.Net core** as back-end. For these two projects, I have using **Minimal APIs** and **MVC** stucture to build these projects.

I get **7As** in my final SPM exam. In my secondary school, I have taken a subject is, Computer Science. It helped me to build a basic knowledge in Information Technology.

PROJECT

Laravel

In my Final Year Project, I using PHP Laravel framework to develop an employee management system, which including some challenging function such as reporting and analytics, attendance, chat system and etc.

ASP.NET

ASP.NET provides the tools and architecture to build this system with a focus on scalability, security, and user experience. The tool that I utilized is Visual Studio 2019
